

# Yousef Zaqout

## Backend Engineer | REST API Specialist

Email: zaqoutyousef@gmail.com

Phone: +972 594 803 033

LinkedIn: linkedin.com/in/yousefzaqout

GitHub: github.com/yousefbzaqout

Location: Remote | Available for KSA, Gulf, US, and EU clients

## PROFESSIONAL SUMMARY

Backend engineer specializing in PHP, Laravel, high-performance RESTful APIs, PostgreSQL, Redis, and Docker. Experienced building payment gateway integrations, AI and RAG pipelines, OpenAPI documentation, and production systems for startups and product teams.

## SKILLS

Languages and frameworks: PHP, Laravel, REST APIs, Clean Architecture, SOLID

Databases and caching: PostgreSQL, Redis, query optimization, indexing

Infrastructure: Docker, deployment environments, Linux

Integrations: Stripe, Moyasar, Tap, OpenAI, RAG pipelines, Telegram, n8n

Documentation and tooling: OpenAPI, Swagger, Postman, Filament, Git, GitHub

## SELECTED EXPERIENCE

### Sanabel IQ — Adaptive Arabic Learning Platform

Backend Engineer | Laravel, PostgreSQL, Redis, Filament, AI / RAG, Multi-tenant

- Built a multi-tenant Laravel backend unifying child, parent, teacher, and school workflows.
- Implemented secure child access flows, Filament admin panels, and Redis queues for file and analytics processing.
- Delivered curriculum engine features with PostgreSQL and vector-assisted learning support.

### FirstTouch SLA — Lead Routing and Response System

Backend Engineer | Laravel 13, Filament, pgvector, AI, Telegram, n8n

- Built a secure Laravel system to ingest leads from multiple ad channels and enforce response SLAs.
- Implemented queue-based workflows, AI-assisted replies, and Telegram / n8n alerting.
- Reduced response time from hours to minutes with measurable queue and compliance metrics.

### AdPilot — Ads and Content Management SaaS

Backend Engineer | Laravel, Filament, AI / LLM, Docker, PostgreSQL, Redis

- Designed domain services for content, ads, analytics, and subscriptions with queue-only external I/O.
- Delivered a production path from account linking through publishing, sync, and budget-safe recommendations.

### Irada Academy — EdTech Platform

Backend Engineer | Laravel, REST APIs, RBAC

- Built Laravel REST APIs for courses, users, and enrollment with role-based access control.
- Improved query performance to keep response times stable under academic workloads.

### Freelance Job Alert Bot

Backend / Automation | Scraping, Telegram

- Developed an automated scraper and filter pipeline with Telegram alerts in under 5 seconds.

### CV Application — API and Frontend Delivery

Backend Engineer | Laravel 12, Vue 3, PostgreSQL, Docker

- Built a Laravel API with Vue 3 frontend and Dockerized environments for development and production.

## **EDUCATION**

### **B.Sc. Software Engineering**

Islamic University of Gaza (IUG)

## **ADDITIONAL EXPERIENCE**

- Khareej Qader Program — Full Stack Developer and Scrum Master at Areisto.
- Gaza Code (Volunteer) — Built real software projects with a collaborative engineering team.
- GitHub achievements: Pair Extraordinaire and Pull Shark.

## **SERVICES**

- Custom Laravel backends and RESTful APIs with Postman and OpenAPI documentation.
- Payment gateway and AI / RAG integrations for production products.
- PostgreSQL and Redis performance optimization with Docker delivery.
